Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election of Species I (claims 1-64) in the reply filed on 09/07/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 17-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamura et al. (2001/0028670).

With respect to claims 1-2, Fig.9 shows a gas discharge chamber 10 comprising an interior wall comprising a vertical wall and an adjacent bottom wall;

a gas circulation fan 3 creating a gas flow path adjacent the interior vertical wall and the adjacent bottom wall;

an in-chamber dust trap 28-29 positioned a region of low gas flow.

With respect to claims 3-4, par.0051 discloses the dust trap comprises a mesh screen.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tamura et al. (2001/0028670).

With respect to claims 17-48, although Tamara et al. disclose the dust trap (28, 29) positioned along the vertical wall as opposed to the claimed bottom wall, such position of the dust trap as claimed in claims 17-32 would have been reasonable expected by one of ordinary skill in the art to perform identical function (i.e, collecting dust) as that of disclosed in the prior art, absent any showing as to why the dust trap positioned at the bottom wall is so critical to the instant invention.

Allowable Subject Matter

Claims 5-16 and 49-64 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
